

EQUIPMENT TRAINING, RESQ SMARTLINE X

Goal:

To equip participants with the skills and knowledge required to safely operate RESQ Smartline X for evacuation and rescue scenarios.

Target group:

Personnel working in environments requiring emergency evacuation solutions, including tower workers, energy industry operatives, and high-risk sites.

Highlights:

- Training on a lightweight, compact device for emergency evacuation and rescue.
- Complies with EN 341:2011 standards for safe controlled descents.
- Hands-on practice with a certified, instructor-led session.

Description

This one-day practical course provides essential training in the operation of RESQ Smartline X personal evacuation device. Participants will learn to safely use the system for controlled descents during emergencies from heights up to 200 metres. The course also covers rescue scenarios involving incapacitated individuals. Delivered by experienced instructors, the training ensures competency in using this lightweight, compact device, including anchoring, descent control, and system maintenance. A valid Basic Rescue at Heights certification is required to attend.

Compliance:

Aligned with EN 341:2011 and PPE Regulation (EU) 2016/425.

Previous knowledge:

Experience operating manual descenders / personal evacuation devices would also be beneficial.

Requirements:

Participants must be aged 18+ and be able to provide a valid recognised Basic Rescue at Heights certification. They should also be physically able to work at height and use rescue equipment.

Progression:

Advanced height safety and rescue courses, including those involving other height rescue systems.

Theoretical elements:

- Overview of the Smartline X features and specifications.
- Safety considerations and compliance with EN 341:2011.
- Developing emergency response plans for evacuation.

Practical elements:

- Safe anchoring and setup of the Smartline X device.
- Controlled descent techniques and troubleshooting.
- Simulated rescue scenarios for incapacitated individuals.

RESQ Smartline X, Personal Evacuation Device Training

 **Course length**
6 hours (1/2 day)

 **Instructor**
1:6

 **Period of validity**
1 year
