

HART CONFINED SPACE

Goal:

To ensure HART operatives meet TIS NH06 standards for confined space work and understand their role and responsibilities during confined space incidents.

Target group:

All HART trusts requiring certification for TIS NH06 for Confined Space.

Highlights:

- Fully compliant with TIS NH06 and tailored to HART trust requirements.
- Includes HART-specific equipment training and scenarios representative of real deployments.
- Offers optional City & Guilds certification in High-Risk Confined Spaces.

Description

Specifically designed for HART trusts, this course equips delegates with a comprehensive knowledge of High-Risk Confined Space working to the standard typical within industry. In addition to this, the course ensures that the content is adapted to be relevant for HART trusts, satisfying the training requirements as defined in TIS NH06 for Confined Space. Such adaptations include the use of HART specific equipment, such as EDBA and Sav Ox rebreather emergency escape sets, working alongside partner agencies and familiarity with partner agency rescue systems, trench rescue awareness and with scenarios engineered to be representative of those in which HART is called upon to provide casualty care throughout. Upon successful completion of this physically and mentally demanding course, delegates will have a working knowledge of the legislation and safe working practices expected for Confined Space work including entry control, how emergencies and problems occur and how as responders to such incidents along with partner agencies can keep themselves safe and provide optimal casualty care.

Compliance:

Confined Space Regulations 1997, National Occupational Standards for Working in Confined Spaces – EUSCS03 (entirely) as well as elements of 04 and 08. HART TIS NH06.

Previous knowledge:

HART Paramedics who have attended BA training and have manual handling training.

Requirements:

Age 18+ and must be clean-shaven each morning for Breathing Apparatus use. Delegates must be fit for training including ladder climbs and moving through enclosed spaces (crawling is required for short distances) whilst wearing EDBA and manoeuvring casualties.

Progression:

Recertification & Refresher training is recommended every 2 years by means of re-attending this course.

Theoretical elements:

- Classroom sessions cover legislation around Confined Space, classifications, specified risks and other risks including atmospheric hazards and other theoretical elements.
- A course manual is issued. Delegates must complete a written exam paper is sat which is assessed.
- A course workbook is issued which is assessed.

Practical elements:

- Practical sessions include teaching sessions and scenario-based training to put the theoretical elements into practice.
- Sessions will include Sav Ox use, Gas monitoring, entry control processes, access equipment and PPE, emergency drills, working alongside rescue systems and services and trench rescue protocols.
- Toe-capped boots and overalls are required.
- Specialist equipment is provided.
- All practical elements are holistically assessed throughout the course.

Hazardous Area Response Teams Confined Space

Course length 24 hours (3 days)

Instructor 1:6

Period of validity 3 years

Certification

Outreach Rescue Certificate of Achievement. Optionally a City & Guilds certificate of achievement for 'Working in High Risk Confined Spaces' Level 2 Award 6160-03 can also be issued at additional registration cost.

Venue

Outreach Rescue, Tan-y-Bwlch Centre, Llanllechid, Bangor, Gwynedd, North Wales LL57 3HY
