

RISK ASSESSMENT & RESCUE PLAN AUDIT

Goal:

To help organisations identify, create, and maintain safety documentation and systems that meet legal and operational requirements.

Target group:

Organisations seeking assistance in producing or validating Risk Assessments, Rescue Plans, and other critical safety documentation.

Highlights:

- Ensures legal compliance with workplace safety requirements.
- Expert guidance tailored to your organisation's needs.
- Comprehensive audit covering all critical safety documentation and rescue plans.

Risk Assessment & Rescue Plan Audit Certification

Customised audit report and documentation guidance tailored to your organisation's compliance needs.

Venue

On-site at your organisation's premises or remotely by arrangement.

Description

A bespoke service offered to UK organisations to ensure compliance with legal obligations in the workplace.

Outreach Rescue can arrange a Risk Assessment & Rescue Plan Audit to support organisations in achieving compliance with workplace health and safety legislation. It is a legal requirement to maintain robust Risk Assessments, Safe Systems of Work/Method Statements, and Rescue Plans. Outreach Rescue offers an expert-led health and safety audit to assess your current documentation and systems. We help identify gaps, develop effective solutions, and ensure your safety protocols meet legislative standards. This service allows you to focus on your work while confidently meeting your legal responsibilities.

Compliance:

Aligned with all relevant workplace health and safety legislation, including the Health and Safety at Work Act 1974 and associated regulations.

Previous knowledge:

No prior knowledge required, though access to existing safety documentation is recommended.

Requirements:

Access to workplace-specific processes, environments, and documentation for assessment purposes.

Progression:

Annual audits recommended to maintain compliance and adapt to regulatory changes.

Theoretical elements:

- Overview of legislative requirements for workplace safety documentation.
- Best practices for creating and maintaining Risk Assessments and Rescue Plans.
- Gap analysis methodology for identifying compliance issues.

Practical elements:

- Review of existing safety documentation and systems.
- On-site audit of work environments and practices.
- Development of tailored Risk Assessments, Safe Systems of Work, and Rescue Plans.
