Description

This 2-day course has been developed in conjunction with industry experts, to provide the knowledge for planning, supervising and managing working at height.

This two-day course covers health and safety regulatory requirements, selecting staff and equipment, producing work schedules and site supervision for work at height. The course is classroom-based, and firstly educates delegates in best practice for working at height, and then continues to how to produce suitable documentation for works. Delegates are assessed by means of a written exam and must produce an assignment. Successful delegates are suitably qualified for positions requiring supervision and management of activities involving work at height.

Compliance:

Work at Height Regulations 2005, LOLER, POWER, PPE Regs, Management of Health and Safety at Work Act, Health and Safety at Work Act

Previous knowledge:

No previous knowledge or experience required. though prior knowledge of Work at Height is beneficial

Requirements:

Participants should be aged 18+ with the ability to participate in assignments and complete written assessments.

Progression:

Recertification & Refresher training is recommended every 3 years by means of re-attending this course. Though this award does not expire.

Theoretical elements:

- This course is classroom based and covers legislation, the work at height hierarchy, PPE, risk assessing, personnel competencies, rescue considerations and the development of documentation for the workplace.
- This course is assessed by means of a written exam paper and the completion of a work assignment which is completed during the course.

Practical elements:

- There are no practical training elements to this course.
